C programming

C++

Html&css

## **PROJECT**

An e-commerce website is a digital storefront where businesses and consumers can buy and sell products or services over the internet. These platforms feature online catalogs, shopping carts, and secure payment processing to facilitate transactions remotely and anytime, unlike a physical store. Popular examples include [Amazon](#) and Walmart.

A portfolio website is a personal online platform used to professionally showcase your skills, best work, and accomplishments. Unlike a resume that lists your experience, a portfolio website serves as a visual and interactive demonstration of your capabilities to potential employers, clients, or collaborators.
